

### This is the Template for the Butterflybadge A6

- Make sure to insert your artwork in a seperate layer "Your Artwork"
- Delete or Hide the layers "Instruction and Butterflybadge XL" before printing to make sure you're not printin this instruction and the badge outlines
- Always make a test print before printing your bulk badges to make sure you can still make slight adjustments
- Only print the Butterflybadges on a laserprinter, ink from an inkjet printer might not stick to the badge surface
